

Get Blizzard API key pair

Step 1:

(1) Open this page <https://develop.battle.net/> and click on “API Access” menu.

(2) Log in with your Blizzard account.

Step 2: Click on “Create Client” button.

Create Client

Client Name
A sample social login app
Client names may be visible to your site users, and are globally unique across all developer accounts.

Redirect URLs
https://demo1.ets-demos.com/sociallogin/module/ets_sociallogin/callback
When using the OAuth2 authorization code flow, users will only be allowed to return to these URLs after authenticating
One URL per line. Must start with "https://" or "http://"

Service URL
https://yourdomain.com
This is the URL of the service that will be using this Client.
Must start with "https://" or "http://"

I do not have a service URL for this client.
If this changes, you acknowledge and agree to update this client's information. You must specify how and from where you are calling the API in the Intended Use field.

Intended Use
This client allows my website users to log in or create a new account using their existing Blizzard account.
How this Client will be used (e.g., provide Players information about their WoW character, inventory, etc.)

* Application Secret
[Where do I get this info?](#)

Callback URL

Copy and paste this Callback URL to get your social network API key pair.

Blizzard requires that you create an external application linking your website to their API. To know how to create this application click on "Where do I get this info?" and follow steps.

Save

Step 4: Copy the **Client ID** and **Client secret** and paste them to **Social Login** module configuration page.
