

Get Tumblr API key pair

Step 1: Open this page <https://www.tumblr.com/oauth/apps> and log in with your Tumblr account.

Step 2: Click on “**Register application**” button.

Step 3: Enter the required information fields.

- At “**Default Callback URL**”, you need to enter the callback URL provided by **Social Login** module.
- Click “**I’m not a robot**” then click on “**Register**” button.

Register your application

• Application Name:

• Application Website:

App Store URL:

Google Play Store URL:

• Application Description:
400 characters max

• Administrative contact email:
This won't be made public.

• Default callback URL:

Flurry Project ID:
(for Tumblr In-App Sharing)

Icon:

Application Page Icon:
Must be a 54x54 opaque square PNG. Users will see this on your app's page.
 

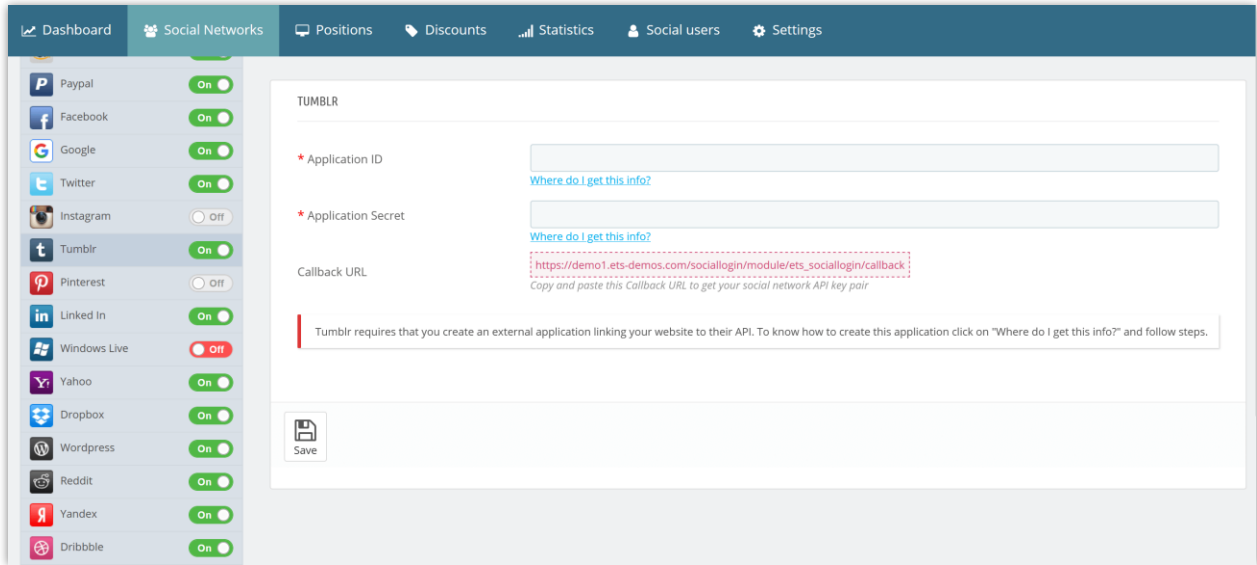

Mobile Dashboard Icon (Retina):
Must be a 44x44 PNG. Users will see this in the post footer with a 6px border radius.

Web Dashboard Icon (Retina):
Must be a 32x32 PNG. Users will see this in the post footer with a 6px border radius.

Web Dashboard Icon (Normal):
Must be a 16x16 PNG. Users will see this in the post footer with a 2px border radius.

Are you a robot?:
 I'm not a robot 

Rate Limits
Newly registered applications are rate limited to 1,000 requests per hour, and 5,000 requests per day. If your application requires more requests for either of these periods, you will be able to request a rate limit removal after completing the registration process.

Step 4: Now you are done, copy **OAuth Consumer key** and **Secret key** then put them on your **Social Login** module configuration.
